Simplus: Simplified English Checker for Worldwide Audiences

Your worldwide audience is growing and you want to be clearly understood by ESL (English as a Second Language) people or non-native speakers of English.

The reality is that the majority of your customers have some, but not much, English knowledge.

So, you have to consider the use of simplified or controlled English.

Indeed, Simplus helps you to write texts that are easier to read for non-native speakers of English.

Simplus provides advanced language engineering to serve simplicity and readability.

Simplus takes advantage of robust grammar checking that performs detailed parsing of sentences.

What is Simplified English?

Simplified English (also called Controlled English) helps to write clear documents using an established writing standard within a particular corporate entity.

SE implies limited choices of standard English words and restricted acceptable sentence structures, but without losing meaning. In other words, SE implies a subset of English words and a subset of English grammar.

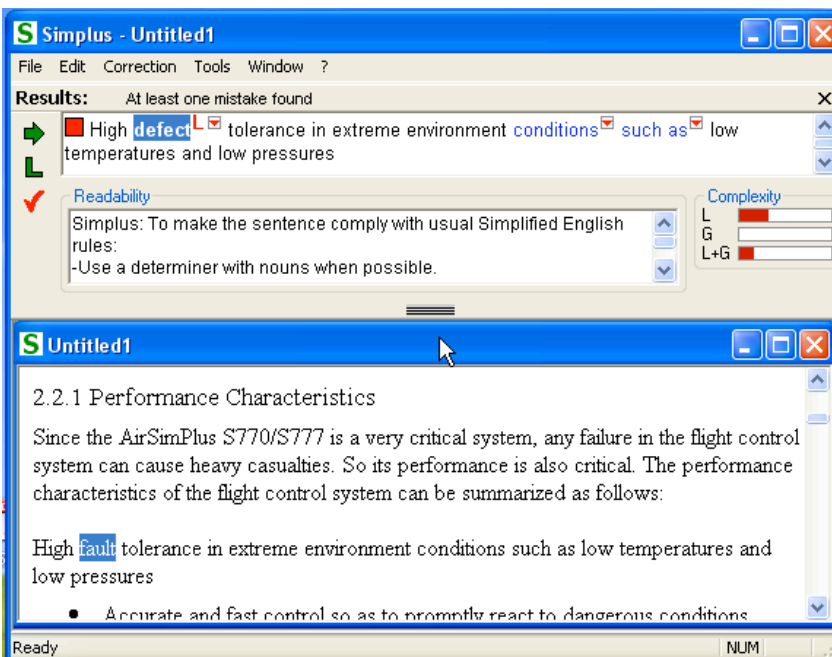

Ambiguities, jargon and synonyms are not permitted in SE. Thus, the golden rule of SE is:

ONE WORD = ONE SENSE

Documents written in SE are thus easier to read, to understand and to translate, particularly for non-English readers.

Write simply to worldwide audiences

Improve readability

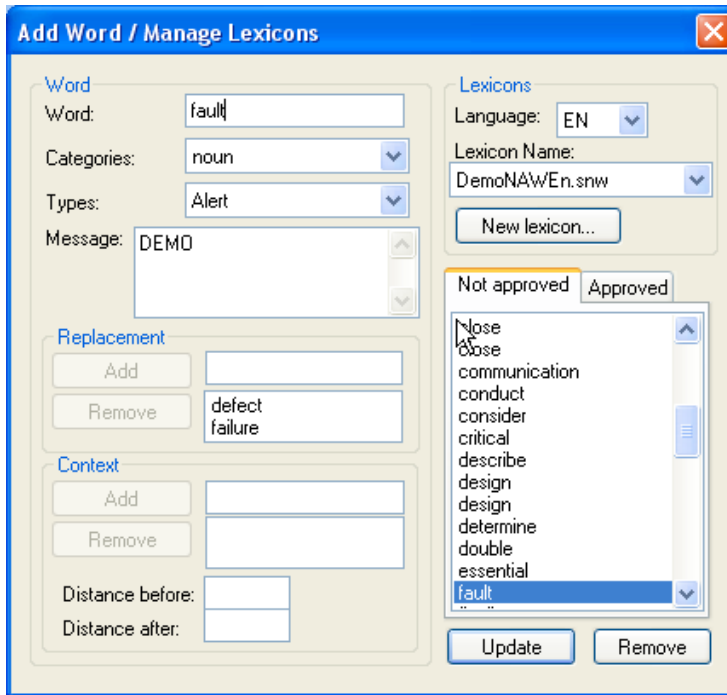

Standardize writing style

Lingua Technologies Inc.
 "Language engineering serving simplicity"

*Simplified English
 for the rest of us!*

Standardize terminology
